DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on July 6, 2006 has been entered.

Response to Amendment

2. This Office action is responsive to applicant's amendment filed June 6, 2006. Claims 1, 3, 4, 6, 8, 9, 11, 13, 14, 16, 18, 20, 22, 24, 26, 28, 30, 32, 34 and 35 are pending.

Double Patenting

3. Claims 34 and 35 objected to under 37 CFR 1.75 as being a substantial duplicate of claims 1 and 22. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

Allowable Subject Matter

4. Claims 1, 3, 4, 6, 8, 9, 11, 13, 14, 16, 18, 20, 22, 24, 26, 28, 30 and 32 are allowed.

5. The following is a statement of reasons for the indication of allowable subject matter: In consideration of applicant's remarks on pages 16-24 of the amendment filed June 6, 2006, it is agreed that the cited prior art, taken alone or in combination, does not disclose or suggest "a controller, in response to the start button being operated by the user of the image data communication apparatus, being configured to control the scanner to scan the image data and to convert the scanned image data into a format for e-mail transmission, the controller being further configured to set the e-mail address of the user, input by the panel, into the mail message of the e-mail to which the image data is attached, the e-mail address of the user being distinct from an e-mail address of the image data communication apparatus, whereby a reply to the e-mail is returned to the e-mail address of the user, the reply not being returned to the e-mail address of the image data communication apparatus," as now recited in base apparatus claim 11 and similarly recited in corresponding base method claim 26, which are the broadest claims. Base apparatus claims 1, 6, 16, 18 and 20, and corresponding base method claims 22, 24, 28, 30 and 32, also recite the allowable limitation, and are narrower in scope.

Conclusion

6. This application is in condition for allowance except for the following formal matters:

Claims 34 and 35 are substantial duplicates of claims 1 and 22, as mentioned above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
